Southgate, MI 48195

SUBJECT: TERMINATION OF RADIOACTIVE MATERIALS LICENSE FOR RAMACHANDRA
VEMURI, M.D., U.S. NRC LICENSE NO. 21-32811-01

Dear Dr. Vemuri:

In NRC Form 314, "Certificate of Disposition of Materials," dated August 12, 2022, signed by Laura T. Speer Smith, M.S., DABR, including your accompanying letter dated August 6, 2022, and the letters dated October 26, 2022 and October 31, 2022, both signed by Laura T. Speer Smith, M.S., DABR, notified the U.S. Nuclear Regulatory Commission (NRC) of a request to terminate U.S. NRC Materials License No. 21-32811-01. The requests are available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML22227A067, ML22300A247 and ML22306A011 respectively.

The requests identified that all licensed radioactive materials have been appropriately transferred for disposal. Documentation of the transfer/disposal of radioactive materials was reviewed. Based on this review, it appears that all licensable radioactive material has been removed from your facility and residual radioactive material attributable to licensed activities does not exceed current U.S. NRC criteria.

Based on this conclusion, no further remediation or actions are required with respect to U.S. NRC-regulated material. Your facility is suitable for release to unrestricted use, and U.S. NRC Materials License No. 21-32811-01 is hereby terminated.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

In accordance with 10 CFR §2.390 of the U.S. NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the U.S. NRC Public Document Room or from the U.S. NRC's ADAMS, accessible from the U.S. NRC's website at <https://www.nrc.gov/reading-rm/adams.html>.

R. Vemuri
