Subject: GEH Morris Operation Physical Security Plan, Revision 9

Reference: (1) NRC License SNM-2500, Docket 72-01

In accordance with 10 CFR 72.186, GE Hitachi Nuclear Energy, L.L.C (GEH) hereby furnishes a report of changes to, and a copy of a new revision of, the Physical Security Plan (PSP) for its Morris, Ill licensed facility. The changes incorporated in this revision of the PSP do not reduce the safeguards effectiveness of the plan.

Enclosure 1 contains a description of the changes made, and Enclosure 2 is the revised PSP itself, which replaces the prior Revision 7 of the plan submitted September 7, 2012, in its entirety. Revision 8 of the PSP was initially issued on January 9, 2017, however additional clarifications were requested during an NRC Region III inspection conducted at the facility earlier this year and these clarifications have been incorporated in Rev 9 of the PSP. Changes are indicated with a vertical line (|) to the right of the changed text or figure.

Please note that Enclosure 1 has been designated as containing Security-Related Information, and, as a result, GEH requests this information be withheld from public disclosure per 10CFR2.390.

Please note that Enclosure 2 has been designated as containing Safeguards Information, and, as a result, GEH requests this information be withheld from public disclosure and protected per 10CFR73.21.
