Docket No. 99902078

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
One White Flint North
11555 Rockville Pike
Rockville, MD 20852-2738

SUBJECT: NuScale Power, LLC Submittal of NuScale NPM-20 250 MWt Standard Design Approval Application Status Report

- REFERENCES:**
1. Letter from NuScale Power to NRC, "NuScale Power, LLC Submittal of 'NuScale 250 MWt Standard Design Approval Regulatory Engagement Plan,' PL-0002-66070, Revision 2," dated February 16, 2021 (ML21047A475)
 2. Letter from NuScale Power to NRC, "NuScale Power, LLC Submittal of NuScale NPM-20 250 MWt Standard Design Approval Application Status Report," dated August 15, 2022 (ML22227A125)

NuScale Power, LLC (NuScale) submitted the NuScale 250 MWt Standard Design Approval (SDA) Regulatory Engagement Plan (REP), Revision 2, in Reference 1. In the plan, NuScale stated its intent to submit periodic updates to the NRC summarizing engagements, submittals, notable project milestones, and future NPM-20 SDA-related activities. The most recent of these summaries is listed as Reference 2. The purpose of this submittal is to provide an update for the period of August 2022 through October 2022 related to NuScale's preparation of the NPM-20 SDA Application (SDAA).

Enclosure 1 is the proprietary version of the "NuScale SDAA Current and Future Activities." NuScale requests that the proprietary version be withheld in accordance with the requirements of 10 CFR § 2.390. The affidavit (Enclosure 3) supports this request. Enclosure 2 is the nonproprietary version.

This letter makes no regulatory commitments and no revisions to any existing regulatory commitments.

If you have any questions, please contact Mark Shaver at 541-360-0630 or at mshaver@nuscalepower.com.

Sincerely,

Carrie Fosaaen
Senior Director, Regulatory Affairs
NuScale Power, LLC

Distribution: Brian Smith, NRC
Michael Dudek, NRC
Getachew Tesfaye, NRC
Bruce Bavol, NRC

Enclosure 1: "NuScale SDAA Current and Future Activities," proprietary version
Enclosure 2: "NuScale SDAA Current and Future Activities," nonproprietary version
Enclosure 3: Affidavit of Carrie Fosaaen, AF-130078

Enclosure 1:

“NuScale SDAA Current and Future Activities,” proprietary version

Enclosure 2:

“NuScale SDAA Current and Future Activities,” nonproprietary version

Recent Activities

The following is a summary of activities that were completed or are ongoing in the reporting period of August through October 2022. This report includes the work on the EPZ LTR, which is a first-of-a-kind project that is not referenced in the Standard Design Approval application (SDAA). Acronyms are listed below.

- ACC – air-cooled condenser
- ACRS – Advisory Committee on Reactor Safeguards
- DWO – density wave oscillation
- EPZ – emergency planning zone
- FSAR – Final Safety Analysis Report
- LTR – topical report
- NRC – Nuclear Regulatory Commission
- RAI – request for additional information
- SER – Safety Evaluation Report

Date	Topic	Follow-up Actions	Status
Aug 11, 2022	Pre-application meeting: Quality Assurance Program Description LTR	Submit LTR	Complete
Aug 24, 2022	Pre-application meeting: Non-Loss-of-Coolant Accident LTR	Submit LTR	In progress
Sep 8, 2022	ACRS subcommittee meeting: EPZ LTR	ACRS full committee	Complete
Sep 14, 2022	Submittal: response to RAI 9936 on Rod Ejection Accident LTR	NRC RAI response review	In progress
Sep 22, 2022	Pre-application meeting: Extended Passive Cooling and Reactivity Control LTR	Submit LTR	In progress
Sep 29, 2022	Pre-application meeting: comprehensive vibration assessment program	Provide 3D tube support models for viewing at NuScale Rockville office	Complete
Sep 30, 2022	Submittal: supplemental response to RAI 9899 on Critical Heat Flux LTR (TR-0116-21012-P-A)	NRC RAI response review	Complete
Oct 5-7, 2022	ACRS full committee: EPZ LTR	NRC issue final SER	Complete
Oct 18-19, 2022	NRC observation: DWO testing	None	Complete
Oct 19, 2022	Submittal: Framatome Fuel and Structural Response Methodologies Applicability to NuScale LTR approved version (TR-108553-P-A Rev. 0)	None	Complete

**NuScale Nonproprietary
NuScale Power, LLC**

Requests for Additional Information (RAIs)

The following is a summary of RAIs that were completed or are ongoing in the reporting period:

eRAI	Associated Document	Status
9899	Critical Heat Flux LTR	Complete
9936	Rod Ejection Accident LTR	NRC review

Activities in Next Reporting Period

The following are NuScale’s forecasted activities for November 2022 through January 2023. In the below table, dates on future NuScale submittals are only proprietary until the document is submitted, and dates on future public meetings are only proprietary until the meeting is published on the NRC website. The proprietary marking on this table, if any, should not prevent the public notification of a meeting once the schedule is agreed upon by all parties.

Target Date	Topic
Nov 4, 2022 (Complete)	Submittal: Quality Assurance Program Description LTR
Nov 17, 2022	Pre-application meeting: emergency core cooling system valve design and testing
{{	
	}} ^{2(c),(d)}
Dec 31, 2022	Submittal: SDAA Revision 0

NuScale Nonproprietary
NuScale Power, LLC

Topical Reports (LTRs)

The following are NuScale’s planned topical reports to be submitted in support of the SDAA.

Licensing Topical Report	Type	Pre-Application Engagement Date
Loss-of-Coolant Accident, Containment Response Analysis, and Inadvertent Operation of a Reactor Valve Evaluation Methodology	Revision 3 of TR-0516-49422	Complete
Non-Loss-of-Coolant Accident Analysis Methodology	Revision 4 to TR-0516-49416	Complete
Extended Passive Cooling and Reactivity Control	New	Complete
Density Wave Oscillation Methodology	New	Complete

**NuScale Nonproprietary
NuScale Power, LLC**

Enclosure 3:

Affidavit of Carrie Fosaaen, AF-130078

NuScale Power, LLC

AFFIDAVIT of Carrie Fosaaen

I, Carrie Fosaaen, state as follows:

- (1) I am the Senior Director, Regulatory Affairs of NuScale Power, LLC (NuScale), and as such, I have been specifically delegated the function of reviewing the information described in this Affidavit that NuScale seeks to have withheld from public disclosure, and am authorized to apply for its withholding on behalf of NuScale
- (2) I am knowledgeable of the criteria and procedures used by NuScale in designating information as a trade secret, privileged, or as confidential commercial or financial information. This request to withhold information from public disclosure is driven by one or more of the following:
 - (a) The information requested to be withheld reveals distinguishing aspects of a process (or component, structure, tool, method, etc.) whose use by NuScale competitors, without a license from NuScale, would constitute a competitive economic disadvantage to NuScale.
 - (b) The information requested to be withheld consists of supporting data, including test data, relative to a process (or component, structure, tool, method, etc.), and the application of the data secures a competitive economic advantage, as described more fully in paragraph 3 of this Affidavit.
 - (c) Use by a competitor of the information requested to be withheld would reduce the competitor's expenditure of resources, or improve its competitive position, in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product.
 - (d) The information requested to be withheld reveals cost or price information, production capabilities, budget levels, or commercial strategies of NuScale.
 - (e) The information requested to be withheld consists of patentable ideas.
- (3) Public disclosure of the information sought to be withheld is likely to cause substantial harm to NuScale. The accompanying report reveals distinguishing confidential, preliminary, and pre-decisional aspects of NuScale's commercial strategy. The precise financial value (loss) resulting from public disclosure of the information is difficult to quantify, but it is sensitive information related to NuScale's commercial strategy and, therefore, has substantial value to NuScale.
- (4) The information sought to be withheld is in the enclosed report entitled NuScale NPM-20 250 MWt Standard Design Approval Application Status Report. The enclosure contains the designation "Proprietary" at the top of each page containing proprietary information. The information considered by NuScale to be proprietary is identified within double braces, "{{ }}" in the document.
- (5) The basis for proposing that the information be withheld is that NuScale treats the information as a trade secret, privileged, or as confidential commercial or financial information. NuScale relies upon the exemption from disclosure set forth in the Freedom of Information Act ("FOIA"), 5 USC § 552(b)(4), as well as exemptions applicable to the NRC under 10 CFR §§ 2.390(a)(4) and 9.17(a)(4).
- (6) Pursuant to the provisions set forth in 10 CFR § 2.390(b)(4), the following is provided for consideration by the Commission in determining whether the information sought to be withheld from public disclosure should be withheld:

- (a) The information sought to be withheld is owned and has been held in confidence by NuScale.
- (b) The information is of a sort customarily held in confidence by NuScale and, to the best of my knowledge and belief, consistently has been held in confidence by NuScale. The procedure for approval of external release of such information typically requires review by the staff manager, project manager, chief technology officer or other equivalent authority, or the manager of the cognizant marketing function (or his delegate), for technical content, competitive effect, and determination of the accuracy of the proprietary designation. Disclosures outside NuScale are limited to regulatory bodies, customers and potential customers and their agents, suppliers, licensees, and others with a legitimate need for the information, and then only in accordance with appropriate regulatory provisions or contractual agreements to maintain confidentiality.
- (c) The information is being transmitted to and received by the NRC in confidence.
- (d) No public disclosure of the information has been made, and it is not available in public sources. All disclosures to third parties, including any required transmittals to NRC, have been made, or must be made, pursuant to regulatory provisions or contractual agreements that provide for maintenance of the information in confidence.
- (e) Public disclosure of the information is likely to cause substantial harm to the competitive position of NuScale, taking into account the value of the information to NuScale, the amount of effort and money expended by NuScale in developing the information, and the difficulty others would have in acquiring or duplicating the information. The information sought to be withheld is part of NuScale's technology that provides NuScale with a competitive advantage over other firms in the industry. NuScale has invested significant human and financial capital in developing this technology and NuScale believes it would be difficult for others to duplicate the technology without access to the information sought to be withheld.

I declare under penalty of perjury that the foregoing is true and correct. Executed on 11/15/2022.

Carrie Fosaaen
