Subject: STATUS of Final Safety Evaluation for Topical Report BWRVIP-321, BWR and Internals Project, Plan for Extension of the BWR Integrated Surveillance Program (ISP) Through the Second License Renewal (SLR)
Date: Wednesday, November 16, 2022 3:07:07 PM

Good afternoon, Wynter,

We just received a request from the Advisory Committee for Reactor Safeguards to review the safety evaluation (SE) for Topical Report BWRVIP-321, BWR and Internals Project, Plan for Extension of the BWR Integrated Surveillance Program (ISP) Through the Second License Renewal (SLR).

We issued the draft SE on August 8, 2022 (Agencywide Documents Access and Management System (ADAMS) Accession No. (ML22186A062) and asked the Electric Power Research Institute (EPRI) if there was any proprietary information in the draft SE. On September 26, 2022 (ADAMS Accession No. ML22271A779), EPRI confirmed that there was no proprietary information in the SE.

Therefore, I will be making the draft SE publicly available today to support and ACRS committee meeting as soon as possible.

Respectfully,

Lois James, Senior Project Manager
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation
