10 CFR 50.90

Ladies and Gentlemen:

**DOCKET NUMBER 50-483
CALLAWAY PLANT UNIT 1
UNION ELECTRIC CO.
RENEWED FACILITY OPERATING LICENSE NPF-30
ADDITIONAL SUPPLEMENT TO LICENSE AMENDMENT REQUEST TO ADOPT
TSTF-439 AND TSTF-505, LDCN 20-0007**

By letter dated October 21, 2021, identified as Reference 1 in the list of references provided on page 3 of this letter, Union Electric Company (Ameren Missouri) submitted an application for amendment of the Renewed Operating License for the Callaway plant (License No. NPF-30). The requested amendment would revise applicable Technical Specifications (TS) to implement risk-informed Completion Times and establish the Risk-Informed Completion Time (RICT) Program for Callaway in accordance with the guidance of TSTF-505, "Provide Risk-Informed Extended Completion Times - RITSTF Initiative 4B," Revision 2.

In regard to the TS changes proposed per the LAR, marked-up pages and "clean" (retyped) pages for reflecting the proposed changes were provided with the Reference 1 LAR. The proposed TS changes underwent revision during the NRC's review such that the originally provided pages were replaced, first per the letter identified as Reference 2 and then again per the letter identified as Reference 3. Subsequent to submittal of the Reference 3 letter, however, it was determined that the none of the sets of TS pages provided per References 1, 2 and 3 included a mark-up(s) or "clean" page(s) of the Table of Contents (TOC) for the TS, as it was confirmed with the NRC that the TOC is considered to be part of the TS. Although the proposed TS changes did not change any of the section titles listed on the TOC, the changes did affect the page numbers for two of the sections, and consequently, the revised page numbers need to be reflected in the affected TOC page.

Based on the above, this letter is submitted to provide a mark-up and "clean" page for the TOC, which are hereby provided as Attachment 1 and Attachment 2 to this letter, respectively.

Additionally, during the review process, several formatting errors were identified in the previously submitted TS pages. These errors have been corrected, and therefore, revised TS markup pages and "clean" pages are hereby provided as Attachment 3 and Attachment 4 to this letter, respectively.

The information provided via this letter does not change the "No Significant Hazards Consideration" conclusions reached in the LAR, nor does it change the conclusion reached in regard to no need for an environmental assessment based on the categorical exclusion provisions of 10 CFR 51.22.

In accordance with 10 CFR 50.91, "Notice for public comment; State consultation," Section (b)(1), a copy of this supplement provided in connection with the above-referenced submittals is being provided to the designated Missouri State official.

Further, this submittal does not contain new commitments.

If there are any questions, please contact Tom Elwood at 314-225-1905.

I declare under penalty of perjury that the foregoing is true and correct.

Sincerely,

Deborah Farnsworth
Senior Director, Nuclear Plant Support
