SUBJECT				
Operating Instruction Discussion				
SUMMARY AND ACTION REQUIRED (IF ANY)				
NRC Participants: Chris Allen				
<p>The TEAMS call began at approximately 3:00 P.M. NRC staff stated that it had identified that the GE-2000 safety analysis report operations chapter was missing information. GEH explained that this information had been removed while revising Certificate of Compliance 9228 to reauthorize shipment of irradiated fuel in Revision 28. GEH further explained that the missing information was not required to demonstrate compliance with the regulations. NRC staff acknowledged this, but explained that the missing information could be important to technical review staff in evaluating if the package could be safely operated by the package user. GEH committed to reinstating the missing information. The call concluded at approximately 3:45 P.M.</p>
