**Subject:** [External\_Sender] Docket ID NRC-2022-0095 NRC AI Strategic Plan comments

Hello Mr. Dennis,

Unfortunately, I missed the deadline to submit comments for the NRC AI Strategic Plan through the regulations.gov website but still wanted to submit these comments/questions for consideration by the NRC.

- (Page 4-2) Will the NRC make public the information the discover about “available AI standards”? In the event that there are no available AI standards, as may be the case, what will the NRC’s course of action be?
- (Page 4-5) Could you provide more information on the pilot projects and proofs of concept that the NRC plans to undertake?
- (General) As the AI and Autonomy Levels approach Level 3 and 4 (well into the future), what activities in the Strategic Plan will ensure the NRC is prepared to properly evaluate and assess the trustworthiness of the AI system vs. the human, given that neither can be perfect.

Sincerely,  
Clevin
