Re: Amendment to License 24-00889-01

Saint Luke's Health System (SLHS), License 24-00889-01 would like to amend the license as follows:

- 1) We are looking into doing Gamma Tile and we need to amend our license to include Gamma Tile sources on our license under 35.400.
  - a. New section under 6 to include "Cs-131 permitted by 10 CFR 35.400"
  - b. New section under 7 to include Sealed Sources (GT Medical Technologies Model: GT-001)
  - c. New section under 8 to be "3 curies total"
  - d. New section under 9 for "For any manual brachytherapy procedure permitted by 10 CFR 35.400"
  - e. Associate the new section with location 10(A).
- 2) Since we have a broad scope medical materials license, I commit to having the written directive 35.40, procedures for administrations requiring a written directive 35.41, training of the Authorized User and staff by the Gamma Tile vendor, the requirements under 10 CFR subpart F Manual Brachytherapy will be followed, and insure that all approved Authorized Users are approved by Radiation Safety Committee and meet training requirements under 35.490 prior to first procedure.

If you have any questions, please contact me at (816) 932-6262.

Thank you for your consideration.

Roy Sions  
Radiation Safety Officer
