Arlington, TX 76011-4511

SUBJECT: NRC INITIAL OPERATING EXAMINATION

Dear Mr. Farina,

Enclosed is the Post exam comments and analysis for the examination that was administered December 14, 2022. This class consists of 8 RO candidates, 2 SRO Instant candidates, and 2 SRO Upgrade candidates.

Please contact Gabe or Gary at (225) 378-3549 if you have any questions or need any further materials.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mike McCue', written over a white background.

Mike McCue
Training Manager
River Bend Nuclear Station

RB-2022, Written Exam Analysis

The class consisted of 12 students (8 ROs, 2 Upgrade SROs and 2 Instant SROs).

Question 67 6/12 missed

RBS has reviewed the question and believes it to be valid and has only one correct answer. This K/A was presented during the training program.

High missed question due to students' attention to detail and level of knowledge. Students were weak on maximum amount of time before the Change Notice (CN) should be incorporated in accordance with RBNP-001. Most students confused the 180 day requirement with 14 days which is the time required to receive all reviews for approval on the Change Notice (CN). The requirement for incorporating is 180 days from the final approval.
