Materials Licensing Branch  
U.S. Nuclear Regulatory Commission, Region III  
2443 Warrenville Road  
Lisle, Illinois 60532-4352

Mr. Kelly,

Subject: Amendment to License 21-03039-01

The Michigan Department of Transportation would like to proceed with the original request dated October 13, 2022, to amend License 21-03039-01. The department is in the process of gathering bids to purchase nine (9) new gauges and dispose of nine (9) existing gauges. This will increase and decrease the amount of radioactive material under the department's license.

Please note that the department never accrued or transferred/disposed of 10 Troxler Electronic Laboratories Model 3400 Series portable gauging devices as was asked in the response letter dated December 5, 2022. The amendment request to increase and decrease quantities will give us adequate cushion to proceed with a purchase while still in possession of the disposal gauges. The disposal gauges would be shipped out within a week of taking possession of the new gauges.

If you have any further questions, please contact Tom Killingsworth, Radiation Safety Officer, at 517-636-4961 or [KillingsworthT@michigan.gov](mailto:KillingsworthT@michigan.gov)
