Radioactive Materials Licensing Program
U.S. NRC Region III
2443 Warrenville Road, Suite 201
Lisle, Illinois 60532

RE: Amendment to your NRC radioactive materials license number 29-28576-01

To Whom it May Concern:

Please accept this notice of amendment to our NRC Radioactive Materials license number 29-28576-01 to transfer control (change of ownership) from Golder Associates USA Inc. to WSP USA Inc. Effective January 1, 2023, Golder Associates USA Inc. will merge with and into its affiliate WSP USA Inc. As a result of the merger, WSP USA Inc. will succeed to all of Golder Associates USA Inc.'s right and obligations. This is an internal corporate reorganization that is the final step in the continued integration of Golder entities into the WSP corporate structure, following the April 7, 2021 acquisition by WSP Global Inc. of Enterra Holdings Ltd., Golder's ultimate parent company. Our corporate structure as it pertains to the organizational charts associated with our radiation safety program will not change.

If we are not able to update our license through the amendment process, please provide me with the necessary steps to close our current license and open a new license under WSP USA Inc. without impact to our current approved processes to store and operate portable nuclear gauges within non-agreement states.

In addition, the new office address for license 29-28576-01 will be:

WSP USA, Inc.

10 Lake Center Drive, Suite 205
Marlton, New Jersey, USA 08053

This address will be for license management only, storage locations will remain the same (Lansing and Holland, MI).

I look forward to hearing back from you. Please contact me if you have any questions or require any additional information. I can be reached at (856) 373-6576 and kevin.dunsmore@wsp.com

Thank you,

Golder Associates USA Inc.

Kevin Dunsmore, RSO

A handwritten signature in blue ink that reads "K Dunsmore".
