1600 Clifton Road N.E.
Atlanta, GA 30333

SUBJECT: U.S. DEPARTMENT OF HEALTH & HUMAN SERVICES, CENTERS FOR DISEASE CONTROL & PREVENTION, LICENSE AMENDMENT, MAIL CONTROL NO. 631248

Dear Dr. Hatcher:

This refers to your license amendment request dated April 14, 2022. Please find enclosed Amendment No. 54 authorizing the release for unrestricted use of the “old” Building 164 Radioactive Waste Room located at 4770 Buford Highway, Chamblee, Georgia. We understand that a new building in a new location on the Chamblee campus will again be designated as Building 164 and will house a new Radioactive Waste Room.

An environmental assessment for this action was not required, since this action is categorically excluded under 10 CFR 51.22(c)(20).

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions regarding the review of the Final Status Survey Report, please contact Orysia Masnyk Bailer by electronic mail to Orysia.MasnykBailey@nrc.gov . If there are any errors or questions regarding the license, please contact me at 240-7-4-4575 or by email to Elizabeth.Ullrich@nrc.gov so that appropriate corrections or answers can be provided.

In addition, please note that the Lawrenceville campus remains listed on the license. We have not yet received any final status survey information for release of facilities formerly used at that location. Until that campus is released, facilities formerly used remain under the responsibility of the license, and the campus must be included in the cost estimates for decommissioning and financial assurance be provided for that campus. At the time of the review of the December 2020 decommissioning funding plan (DFP) update, we were assured that surveys were to be done for this campus. However, we have not yet seen results of any such surveys. Your next revised DFP is due in December 2023 (unless it was submitted with the recent renewal).

You will be periodically inspected by the NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action(s) against you. This could include issuance of a Notice of Violation, or Imposition of a Civil Penalty, or an Order Suspending, Modifying or Revoking Your License as specified in the NRC Enforcement Policy.

The NRC Enforcement Policy is available at:
<http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

An electronic version of the NRC's regulations is available on the NRC Web Site at: www.nrc.gov. Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web Site at: <http://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web Site at: <http://www.nrc.gov/about-nrc/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31, and in accordance with 10 CFR 2.390, this letter and the enclosed license document are exempt from public disclosure because their disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web Site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security-related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

Thank you for your cooperation.

Sincerely,

Betsy Ullrich, Senior Health Physicist
Commercial, Industrial, R&D
and Academic Branch
Division of Radiological Safety and Security
