David:

Thank you for the update. We will put the NuFuels, Inc. (NuFuels) 5-year plan in the Nuclear Regulatory Commission (NRC) Agencywide Documents Access and Management System (ADAMS) as publicly available in the Crownpoint Uranium Project (CUP) docket 04008968. The NRC staff does not generally comment on licensee's project workplans. However, I did skim over the document and provide the following observations:

- The NRC license SUA-1580, CUP, has not been renewed and was not renewed in February 2017 as stated in the NuFuels 5-year plan in Section 1.2 and 4.3.
- The reference to (NRC, 2019) in Section 1.2, is unclear.

The NRC staff considers the license in timely renewal and the renewal process in abeyance until further notice as stated by NRC in a letter dated November 13, 2014 (ADAMS Accession No. ML14296A690). On February 7, 2017, the NRC staff administratively amended Materials License SUA-1580, and issued Amendment No. 4, to change the address for Hydro Resources, Inc. (HRI) and the mailing address for NRC correspondence (ADAMS Accession Package No. ML16067A083). The license was not renewed in February 2017. On July 16, 2018, the NRC staff administratively amended Materials License SUA-1580, and issued Amendment No. 5, to change the licensee's name from HRI to NuFuels. The current NRC license, SUA-1580, Amendment No. 5, dated July 16, 2018, contains an expiration date of January 5, 2003 (ADAMS Accession Package No. ML18155A198).

The NRC staff will revisit the review status of the renewal application as stated in its November 13, 2014, letter.

Please contact me if you have additional questions.

Mr. Linton

We were able to complete a comprehensive 5-year plan with our NuFuels, Inc. team and our key consultants over the holidays. We have prepared the attached for your final review and comment. If it is acceptable, please consider this our plans for the CUP for the next 2-3 years related to the NRC license, if you need additional information or have comments we would be happy to adjust the report.

Please advise.

Best Regards,

David Thomas

Subject: [External_Sender] RE: NuFuels CUP- future plans

Good Morning Ron:

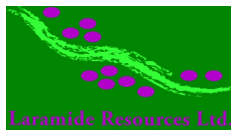

We will pull together a scope and schedule of our tentative plans related to CUP for the next 2-3 years related to our NRC license. I will reach out to our internal team and consultants and revert early next week.

Thank you for reaching out. My contact details are below, feel free to reach out anytime.

Best Regards,

David

Subject: FW: NuFuels CUP- future plans

David:

I was in a call with EPA today and they provided me with your contact information. Can you provide me with an update to plans for the CUP for the next 2-3 years related to the NRC license?

Thanks.

Dennis:
I have this as your contact information from NRC's Santiago Aguilar and his annual requests for Additional Protocol information. I'm forwarding my request to Mark Pelizza to you for response. Please contact me or have your current Crownpoint Uranium Project lead contact me for an update for the site. I've worked with Mark over the years, but I do not know if he is the current contact for the NRC for this project.
Thank you.

Subject: NuFuels CUP- future plans

Hi Mark:
Can you update me on any plans NuFuels has for the Crownpoint Uranium Project (CUP) looking out over the next 2 years. We are constantly updating our staffing plans going forward a few years out and would like to plan for any foreseeable work in that timeframe. If you are not the contact any longer for the CUP, please let me know who I should contact for future updates.
Thanks
