SUBJECT: HOLTEC INTERNATIONAL'S APPLICATION FOR SPECIFIC INDEPENDENT SPENT FUEL STORAGE INSTALLATION LICENSE FOR THE HI-STORE CONSOLIDATED INTERIM STORAGE FACILITY FOR SPENT NUCLEAR FUEL – REVISED REVIEW SCHEDULE

Dear Kimberly Manzione:

By letter dated March 30, 2017 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML17115A431), as supplemented, Holtec International (Holtec) submitted to the U.S. Nuclear Regulatory Commission (NRC) an application for a specific independent spent fuel storage installation license to construct and operate the HI-STORE Consolidated Interim Storage (CIS) Facility, in Lea County, New Mexico, in accordance with the requirements of Part 72 of Title 10 of the *Code of Federal Regulations* (10 CFR Part 72), "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste and Reactor-Related Greater than Class C Waste." The license application seeks NRC approval to store up to 8,680 metric tons of commercial spent nuclear fuel in the HI-STORM UMAX Canister Storage System for a 40-year license term.

On November 24, 2022, Holtec submitted a revision to the safety analysis report and supplemental analyses of the license application (ML22331A002), which were subsequently supplemented on December 23, 2022 (ML22357A117) and January 20, 2023 (ML23020A128). The staff has reviewed these supplements and determined that they contain sufficient information for staff to complete its review and make the necessary compliance findings. The staff expects to publish the final safety evaluation report (SER) (in conjunction with its final licensing decision) by the end of March 2023.

K. Manzione
