Subject: Extension of Audit Plan: Vogtle, Units 1 and 2 - ATF LTAs LAR to Allow Use of 6-Weight Percent Enriched Fuel Rods in 4 LTAs (L-2022-LLA-0097)

Importance: High

DeLisa and Ernest,

By letter dated June 30, 2022 (Agencywide Documents and Access Management System (ADAMS) Accession No. ML22181B156), Southern Nuclear Operating Company (SNC) submitted a license amendment request (LAR) for Vogtle Electric Generating Plant, Units 1 and 2. The proposed license amendment request (LAR) would allow the use of lead test assemblies for accident-tolerant fuel.

By letter dated October 7, 2022 (ML22103A253), the U.S. Nuclear Regulatory Commission (NRC) staff issued an audit plan that conveyed intent to conduct a regulatory audit to support its review of the subject LAR. In the audit plan, the NRC staff stated that "A desktop audit will take place between December 1, 2022, and January 31, 2023."

The NRC staff has decided to extend the audit until February 28, 2023.

Thanks.
John
