RAM License No. 06-00253-04 (Hartford Hospital)

Subject: An amendment request to increase the maximum amount of radioactive material that we are allowed to possess at any one time for use under 10 CFR 35.300.

Dear, Ms. Nguyen;

Please amend our Radioactive Material Handling License to allow the hospital to possess, at any one time, up to three (3) Curies total of radioactive materials for use under 10 CFR 35.300.

With the FDA's recent approval of Lu-177 Pluvicto for PMSA-positive metastatic castration-resistant prostate cancer we have expanded our radioactive therapy services to accommodate for the demand from our referral base. After reviewing the other types of therapies the hospital provides under 10 CFR 35.300 we have concluded that the increase to three (3) Curies is necessary for us to continue to provide timely care to the communities we serve. For any questions please contact Erik Lyons, Assistant RSO at [erik.lyons@hhchealth.org](mailto:erik.lyons@hhchealth.org). Thank you.

Sincerely,

A handwritten signature in blue ink, appearing to read "Cheryl Ficara", with a stylized flourish at the end.
