Technical Specification 6.9.1.5.b

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington DC 20555-001

Hope Creek Generating Station
Renewed Facility Operating License No. NPF-57
Docket No. 50-354

Subject: Technical Specification 6.9.1.5.b
2022 Annual Report of SRV Challenges

This report is submitted in accordance with Hope Creek Technical Specification 6.9.1.5.b, which requires documentation of all challenges to main steam line safety/relief valves (SRVs) on an annual basis.

For 2022, the SRVs were not challenged by any over pressurization events or transients that would have required the valves to respond automatically.

There are no regulatory commitments contained in this letter.

If you have any questions or require additional information, please contact Ms. Bernadette Humphrey at 856-339-1308.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Agster", written over a horizontal line.

Thomas R. Agster
Plant Manager
Hope Creek Generating Station
