Comments: In August 2021, the Commission directed the NRC staff to provide a notation vote paper containing a range of options for the scope of a potential rulemaking. This direction was in response to an October 2019 staff paper that recommended discontinuing the previously-proposed rulemaking, having determined that a rulemaking solely to codify post-9/11 security orders would not improve public health and safety or the common defense and security, and would not be cost-justified. This is the last of three public meetings in 2023, each focused on specific aspects of security for nuclear material.

The NRC provides reasonable accommodations to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in a meeting or need a meeting notice or the transcript or other information from a meeting in another format (e.g. braille, large print), please contact Anne Silk, NRC Reasonable Accommodations Coordinator, at Anne.Silk@nrc.gov or call directly at 301-287-0745. Determinations on requests for reasonable accommodation will be made on a case-by-case basis. Ten (10) days' advance notice is requested to try to ensure availability; however, every effort will be made to address a request for reasonable accommodations with less notice.
