Tinina,

Thanks for the documents. I was able to successfully download them. Shortly, I will be placing them in NRC's document management system. I presume the draft files should be withheld from public disclosure. Is there any reason to withhold the final EECA or the final Rad Survey report from public disclosure?

Also, are you still seeking comment on the draft work plan? If so, what is the date you'd like to receive comments, if any, from NRC? NRC is typically are provided up to 60 days, but it looks like your period just expired for the state agencies.

Thanks,
Chris

Chris,

Just letting you know that I am about to send you the DOD SAFE link to upload the rad-related documents for NASNI IR Site 10 today. Sorry for being so late getting back to you on this. Are there other folks at NRC that I should send the DOD SAFE link to?

Michael Pound and I talked about this a couple weeks ago and he told me that he will get back to you separately.

Tinina

Chris:

Thanks for the meetings today. Below is a link to the public web sites for our installations that includes the Admin Record. Just select California and you will then see a list of facilities for NAVFAC SW along with the BRAC installations listed as well. As Michael indicated during the call we are in process of updating these links to include a lot more background information, but all currently have a link for the administrative record.

Subject: [Non-DoD Source] NRC-DoD MOU

As promised at the calls today, for your information I am providing a link to the NRC-DoD Memorandum of Understanding:

https://www.nrc.gov/docs/ML1609/ML16092A294.pdf

Thanks for your time and attention on this matter,
Chris
