

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION III
2443 WARRENVILLE ROAD, SUITE 210
LISLE, ILLINOIS 60532-4352

May 5, 2023

Andre Byard Stovall, M.D.
Radiation Safety Officer
Dupont Hospital
2520 E Dupont Rd.
Fort Wayne, IN 46825

SUBJECT: AMENDMENT NO. 18 TO RADIOACTIVE MATERIALS LICENSE FOR DUPONT HOSPITAL, NRC LICENSE NO. 13-32291-01

Dear Dr. Stovall:

Enclosed is Amendment No. 18 to Dupont Hospital's (your) U.S. Nuclear Regulatory Commission (NRC) Materials License No. 13-32291-01 in accordance with your April 13, 2023 request to remove the 2610 E Dupont Rd. suite from the locations authorized for use under your license. Your letter is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML23109A276. The NRC's ADAMS is accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.22(c) .

The NRC staff has reviewed your final status surveys for the 2610 E Dupont Rd., Fort Wayne, Indiana location of use. Based on its review, the NRC staff has concluded that all licensable radioactive material has been removed from the facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on these conclusions, no further remediation or actions are required with respect to NRC-regulated material at the 2610 E Dupont Rd. location of use. Your facilities at 2610 E Dupont Rd., Ste. 207, Fort Wayne, Indiana, are suitable for unrestricted use. In accordance with the removal of this location, your license availability has been changed to public.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS.

Sincerely,

Sara A. Forster, M.S.
Health Physicist
Materials Licensing Branch
Division of Radiological Safety and Security
