Mercy Hospital - St. Louis 24-00794-03		CN 632241			
SUBJECT					
Pending NRC License Amendment Request - Additional Information Required					
SUMMARY AND ACTION REQUIRED (IF ANY) This request for information is in reference to the NRC license renewal request dated February 21, 2023. Please provide your response to the following items by no later than Friday, May 12, 2023. 1. Provide a historical review of the radionuclides previously used in this area of use, including any sealed sources. If sealed sources were used in this area please provide a copy of the most recent leak test records and confirm that the sources have been transferred to another authorized location on the license. 2. During a recent quality assurance audit of licensing actions that included your Feb. 2023 license renewal, it was determined that a required licensing commitment relating to instrument calibration procedures was not included in the submitted application and was missed during the review process. Please provide the following statement: "We have developed and will implement and maintain written radiation survey instrument calibration procedures in accordance with the requirements in 10 CFR 20.1501 and that meet the requirements of 10 CFR 35.61." Additionally, it was identified that the submitted application listed the address for the Mercy - Fenton location as 1203 Smizer Mill Rd., St. Louis, MO but the issued license lists the address as being located in Fenton, MO. Could you please confirm the correct address to be listed?
