Re: Expedited Amendment to Section **8S** for Materials License Number 13-32670-01

To whom it may concern,

I'm submitting this correspondence to request an expedited amendment to our company's Materials License (13-32670-01; Cleveland-Cliffs Burns Harbor, LLC).

A recent NRC Inspection at our facility on 4/27/23 identified a discrepancy between our source inventory and allowable source activity on our license. We are requesting an expedited amendment to bring our Plant into compliance. We request the following amendment:

1. Please change the wording in Section **8S** to read as follows:
 - **10 curies per source and 20 curies total**

We reviewed our past licenses and found this to be inaccurate dating back to Amendment No. 5 of our license following an application dated Oct 31, 2017. We have reviewed our submitted materials from that time and do not find any request to have the allowable quantity be "5 curies per source and 20 curies total"

Thank you,
Sincerely

A handwritten signature in black ink that reads "James O'Reilly".
