Secretary,
U.S. Atomic Energy Commission
Washington, D. C. 20545

Dear Sir:

We have reviewed the Tentative Supplementary Criteria for ASME Code - Constructed Nuclear Pressure Vessels which were issued for comment by the AEC in August 1967 and have considered whether or not we should submit detailed comments. We have come to the conclusion that instead of so doing, we strongly recommend for your serious consideration the comments being prepared by the Subcommittee on Nuclear Power of the ASME Boiler and Pressure Vessel Committee.

Our organization has participated in the discussions which were the basis for the ASME comments and we find that we are in essential agreement with their conclusions.

Very truly yours,
YANKEE ATOMIC ELECTRIC COMPANY
