Mr. Cherry,

This email acknowledges your submittal of Amendment Request 8 for Davy Crockett Source Materials License SUC-1593, requesting:

- (1) to extend the Radiation Control Area (RCA) at Joint Base Lewis-McChord following the Army's discovery of four M101 depleted uranium spotting rounds outside the RCA,
- (2) an exemption from the radiation safety requirements of the Radiation Safety Plan for Army soldier training activities, and
- (3) correcting some of the installations to revised names, per recent Army initiative.

The NRC staff will begin the acceptance review and issue a letter with the timeline for amendment.

Thank you,

Priya Yadav, P.E.
