Subject: ACCEPTANCE OF CENTRUS REQUEST FOR AMENDMENT TO ISSP- CAC/EPID L-2023-SPR-0003
Date: Wednesday, June 7, 2023 1:08:00 PM

Dear Kelly Fitch:

The U.S. Nuclear Regulatory Commission (NRC) staff has received your submittal dated April 6, 2023 (Agencywide Documents Access and Management System (ADAMS) Number ML23108A104), requesting to amend the Information System Security Plan (ISSP).

We have completed our acceptance review of your submittal and have identified no administrative omissions or deficiencies that would prevent us from proceeding with a detailed review. Your submittal has been assigned Cost Activity Code (CAC)/Enterprise Project Identification Number (EPID) L-2023-SPR-0003. Please reference this number and Docket Number 70-7004 in any future correspondence associated with this request.

Please note that the NRC staff's technical review of your submittal may identify issues that could require that you provide additional information. Based on our preliminary evaluation and projection of current review schedules, we anticipate completing our formal review by July 2023. This schedule includes the issuance, if needed, of a request for additional information (RAI) by June 15, 2023, and receiving your response to the RAI 10 days after its issuance. Please note that these dates could change depending on the findings of our technical review, urgent assignments, or other factors, such as whether your responses to the RAI are or not adequate. Within 30 days after completion of the NRC staff review of your application/submittal, a notice will be published in the *Federal Register* to inform the NRC staff's decision regarding your submittal. The NRC staff estimates that completing the review of your submittal will require approximately 20 staff hours which corresponds to about \$5,800.00 [provide cost per hour that applies during the Fiscal Year - \$ 290.00/hr. This rate may change when the FY 2023 final fee rule is implemented]. We will promptly communicate significant schedule and/or cost changes, if any.

In accordance with Title 10 of the *Code of Federal Regulations*, Section 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of the NRC's ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

If you have any questions regarding this communication, please contact me at 301-415-2328, or via e-mail to Jennifer.tobin@nrc.gov.

Sincerely,
Jenny Tobin, Project Manager
Fuel Facilities Licensing Branch
Division of Fuel Management
Office of Nuclear material Safety

and Safeguards
