Re: License No. 21-01492-02 Control No. 634985

We have requested removal of Dr. Michael Warren from our license. As he is our only AU for Y90 microspheres, we are requesting that you list Y90 Microspheres on our license as "possession only, pending." We understand that once a new AU is available we will amend our license to add them as an AU for Y90 and request that the Y90 authorization for administration be reinstated.

We have invested a significant amount of time developing this program and so would appreciate the option of keeping authorization of Y90 microspheres on our license until another AU can be added to the license. We request this pending status for 24 months. If at that time, the program has not re-started, we will request complete removal of Y90 from our license.

Thank you for your time and assistance. If you have any questions, please contact our consultant, Tracy King, at 734-662-3197.

Respectfully,
