**Subject:** Corrected Version of NEDO-33910-A Revision 2, BWRX-300 Reactor Pressure Vessel Isolation and Overpressure Protection Licensing Topical Report

**Reference:** 1. GEH Letter M210082, "NEDC-33910P-A, Revision 2, BWRX-300 Reactor Pressure Vessel (RPV) Isolation and Overpressure Protection Licensing Topical Report," dated June 30, 2021.  
2. email, Jim Shea (NRC) to Jesus G. Diaz-Quiroz (GEH), "EXT: RE: RE: Call Between GEH and NRC on BWRX-300 Topical Report Status," July 6, 2022.

In Reference 1, GE-Hitachi Nuclear Energy Americas, LLC (GEH) submitted Revision 2 of the subject Licensing Topical Report (LTR). NRC staff later identified, in Reference 2, that Enclosure 2 of Reference 1, NEDO-33910-A Revision 2, was inadequately redacted and contained GEH proprietary information that was recoverable in Appendix A. In response, the NRC staff notified GEH and removed NEDO-33910-A Revision 2 (ADAMS accession number ML21183A262) from public viewing.

Enclosed please find a corrected version of NEDO-33910-A Revision 2. GEH has confirmed that all GEH proprietary information has been correctly redacted.

If you have any questions, please contact me at 910-200-3295.

Sincerely,

George E. Wadkins  
Vice President, New Power Plants and Products Licensing  
GE-Hitachi Nuclear Energy Americas, LLC
