NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

June 1, 2023

James Warden,
Director, Office of Nuclear Energy,
Safety & Security, Room 3320 HST
Bureau of International Security
& Nonproliferation
U.S. Department of State
2201 C Street, NW
Washington, D.C. 20520

Dear Dir. Warden:

Enclosed is an application dated May 15, 2023, received by the U.S. Nuclear Regulatory Commission (NRC) from Halliburton Energy Services, requesting amendment No. 03 to its export license PXB219.02. This license presently authorizes the export of Category 2 quantities of Americium-241, Americium-241/Be, Californium-252, Cobalt-60, and Cesium-137 for oil and gas well logging and perforating services.

The purpose of the amendment is to extend the date of expiration from June 30, 2023, to June 30, 2025.

The NRC will perform an internal review. The NRC intends to issue the requested license after the 30-day time period allotted for public review has expired, and it is determined that the applicable export license criteria are met. Please feel free to reach out with any questions to Licensing Officer, Joanne Savoy at Joanne.Savoy@nrc.gov.

Sincerely,

6/1/2023

 Peter J. Habighorst
