On June 7, 2023, the U.S. Nuclear Regulatory Commission (NRC) held a two-part public webinar to discuss the NRC's assessment of the safety performance at operating facilities located in Pennsylvania, Maryland, New Jersey, and New York for 2022. During the first part of the webinar, the NRC staff presented the Agency's assessment of the safety performance at each facility for the period of January 1, 2022, through December 31, 2022, as described in the annual assessment letters for each site. The second part of the webinar provided members of the public the opportunity to submit questions verbally or in writing regarding topics discussed during the first part of the webinar and the NRC's role in ensuring safe plant operations. Members of the public, State officials, elected officials or their staff, and members of the media participated in the meeting.

Enclosure 2 is a complete list of those who participated in the webinar, which was led by Erin Carfang (Branch Chief, Division of Operating Reactor Safety), Brice Bickett (Branch Chief, Division of Operating Reactor Safety), Matthew Young (Branch Chief, Division of Operating Reactor Safety), and Sarah Elkhiamy (Acting Branch Chief, Division of Operating Reactor Safety).

Copies of the slides used by the NRC staff during the webinar can be accessed through the NRC's Agencywide Documents Access and Management System (ADAMS) using Accession Number ML23157A035. ADAMS is accessible from the NRC Web page at: <http://www.nrc.gov/reading-rm/adams.html>. The NRC staff responded to questions that were submitted through the webinar process.

The meeting notice was issued on May 4, 2023, posted on the NRC's public webpage, and can be found in ADAMS using Accession Number ML23124A107. Additional information relevant to the NRC's annual assessment process and the safety performance of each site can be found on the NRC's website at: <https://www.nrc.gov/reactors/operating/oversight.html>.
