SUBJECT: NINE MILE POINT NUCLEAR STATION, UNIT 1 - OPERATOR LICENSING
RETAKE EXAMINATION APPROVAL

Dear David Rhoades:

The purpose of this letter is to provide U.S. Nuclear Regulatory Commission (NRC) approval of the proposed operating test under Title 10 of the *Code of Federal Regulations* (CFR) 55.40(b)(4) and to confirm the final arrangements for the upcoming operator licensing examination at Nine Mile Point Nuclear Station, Unit 1.

The NRC has approved the subject examinations, and the NRC staff will administer the operating test during the week of July 10, 2023. The NRC has provided the list of the applicants approved to take the examinations to Thomas Tanguay, Senior Manager Site Training. The examinations have undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examinations meet the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering the examination, you also agree that the examination meets NUREG-1021 guidelines and are appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at (610) 337-5306.

D. Rhoades

Please contact your NRC Chief Examiner, Chris Lally, at (610) 337-5124, if you have questions or identify any errors specified for each applicant approved to take the examinations.

Sincerely,

Donald E. Jackson, Chief
Operations Branch
Division of Operating Reactor Safety
