Dear Scott Murray:

The U.S. Nuclear Regulatory Commission (NRC) staff received your submittal dated October 4, 2022 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML22277A539). The NRC staff initiated an acceptance review and determined that the submittal did not contain sufficient information. The NRC staff issued requests for supplemental information (RSI) on April 10, 2023 (ML23089A239). The NRC staff has received RSI responses by letters dated April 26, 2023 (ML23116A184), and June 27, 2023 (ML23178A099).

We have completed our acceptance review of your submittal and RSI responses. We have identified no administrative omissions or deficiencies that would prevent us from proceeding with a detailed review. Your submittal has been assigned Enterprise Project Identification Number (EPID) L-2022-DDP-0002. Please reference this EPID number and docket number 07001113 in any future correspondence associated with this request.

Please note that the NRC staff's technical review of your submittal may identify issues that require additional information. Based on our preliminary evaluation and projection of current review schedules, we anticipate completing our formal review by October 31, 2023. This date could change depending on the findings of our technical review, urgent assignments, or other factors. We will promptly communicate any significant changes to this schedule. In addition, the NRC staff estimates that completing the review of your submittal will require approximately 100 staff hours which corresponds to about \$30,000.00 (\$300.00/hour).

In accordance with Title 10 of the *Code of Federal Regulations*, Section 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of the NRC's ADAMS. ADAMS is accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).
