SUBJECT: AMENDMENT NO. 35 TO RADIOACTIVE MATERIALS LICENSE FOR NOBLE HEALTH AUDRAIN, INC. D/B/A NOBLE HEALTH AUDRAIN COMMUNITY HOSPITAL, NRC LICENSE NO. 24-15122-01

Dear Kerri:

Enclosed is Amendment No. 35 to Noble Health Audrain, Inc. d/b/a Noble Health Audrain Community Hospital's (your) U.S. Nuclear Regulatory Commission (NRC) Materials License No. 24-15122-01 in accordance with the portion of your November 17, 2022 letter that requested to place the license in a standby possession-only status. Please note that, in accordance with the requirements in Title 10 of the *Code of Federal Regulations* (10 CFR) Section 30.36(d), the expiration date on your license has been updated to July 31, 2025, which is 24 months from now.

Please note that licensed material listed on this license cannot be used until a license amendment request is received by the NRC and the license is amended accordingly. Your request must name a Radiation Safety Officer (RSO) and at least one Authorized User (AU) meeting the requirements in 10 CFR Part 35, to be considered for amendment. Please also note that – in accordance with the requirements of 10 CFR 30.34(b) – the NRC must consent to any Change of Control (COC) – including that referenced in your letter – prior to amending the license for use.

Your letter is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML22322A205. The NRC's ADAMS is accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

To request the addition of an RSO, please provide the individual's name and the NRC License No. or copy of Agreement State License or Master Materials License (MML) on which the individual has been listed as an RSO, in the past 7 years, or refer to 10 CFR 35.50 for training and experience needed. If needed, please use the most current version of NRC's Form 313A (RSO), "Radiation Safety Officer or Associate Radiation Safety Officer Training, Experience, and Preceptor Attestation," which is available in NRC's ADAMS at Accession No. ML12164A742.

To request the addition of an AU, authorized for 10 CFR 35.100, 10 CFR 35.200, or in vitro use, please provide the physician's name and the NRC License No. or copy of Agreement State License or Master Materials License (MML) on which that AU has been authorized for 10 CFR 35.200 (or, 35.100, as applicable), in the past 7 years, or refer to 10 CFR 35.290 (or 35.190, as applicable) for training and experience needed. If needed, please use the most current version of NRC's Form 313A (AUD), "Authorized User Training, Experience, and Preceptor Attestation (for uses defined under 35.100, 35.200, and 35.500)," which is available in NRC's ADAMS at Accession No. ML12164A733.

To request the addition of an AU, authorized for 10 CFR 35.300, or limited 10 CFR 35.300 use, please provide the physician's name and the NRC License No. or copy of Agreement State License or Master Materials License (MML) on which the AU has been authorized for 10 CFR 35.300 (or subset thereof, as applicable), in the past 7 years, or refer to 10 CFR 35.390, 35.392, or 35.394 (or 35.396, as applicable) for training and experience needed. If needed, please use the most current version of NRC's Form 313A (AUT), "Authorized User Training, Experience, and Preceptor Attestation (for uses defined under 35.300)," which is available in NRC's ADAMS at Accession No. ML12164A741.

To request NRC consent for COCs of the license since the March 16, 2021 transfer (the date on which you indicated that the transfer from SSM Audrain to Noble Health Audrain, Inc. d/b/a Noble Health Community Hospital via details dated March 23, 2021) that NRC consented to via September 27, 2021 letter, please submit applicable "Information Needed for Transfer of Control Application," requested in NRC's NUREG 1556, Volume 15, revision 1, "Consolidated Guidance About Materials Licenses: Guidance About Changes of Control and About Bankruptcy Involving Byproduct, Source, or Special Nuclear Materials Licenses," Appendix E, pp. E-1 to E-2. Note that a separate request for consent for each COC is needed, regardless of whether the transfer has already occurred.

Your March 23, 2021 details, NRC's September 27, 2021 letter, and NRC's NUREG 1556 Vol. 15, rev. 1 guidance volume may be found in NRC's ADAMS at Accession Nos. ML21082A185, ML21251A595, and ML16181A003, respectively.

Please also note that, for NRC to amend the license for medical use, any fee issues must be resolved. For additional information regarding fees, please contact the NRC's Accounts Receivable Helpdesk at [FEES.Resource@nrc.gov](mailto:FEES.Resource@nrc.gov) or 301-415-7554.

An environmental assessment for this action is not required because this action is categorically excluded under 10 CFR 51.22(c).

Please review the enclosed document carefully and be sure that you understand and implement all the conditions incorporated into the amended license. If there are any questions, please contact me at 630-829-9892 or via electronic mail at [sara.forster@nrc.gov](mailto:sara.forster@nrc.gov).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS.

Sincerely,

Sara A. Forster, MS
