Subject: RE: Clarification re PharmaLogic Amendment to Increase Ge/Ga possession limits, NRC License No. 21-32190-01MD, CN 635954
Date: Thursday, June 22, 2023 4:23:00 PM

Good afternoon, James:

I have two quick clarification questions regarding the referenced amendment request, for which NRC's review is ongoing.

1. Is the Ste. information needed to be listed on the license in Condition No. 10 (location of use). Or is the address as currently listed adequate to meet PharmaLogic's (your) needs?
2. Is the only substantive change to the license the increased Ge-68/Ga-68 possession limits? For example, has the generator breakthrough testing policy been updated from information previously submitted to NRC?

Please note that this review is limited to the possession limit increase only. The updated decommissioning funding plan (DFP), decommissioning cost estimate (DCE), Financial Assurance certification, and Standby Trust Agreement are being reviewed separately. NRC will need a financial assurance instrument (surety bond, letter of credit, etc.) in-house prior to accepting DFP/DCE, STA, and certification. We will be in touch soon regarding that review.

If you could reply via email or letter (electronic pdf attached to an email is fine) within 14 days (on or before July 6, 2023), that is appreciated.

Thank you,

Sara

Good morning, James,

Can you please provide me with the license number for the license that you requested be amended?

Thank you,
Tammy

Subject: [External_Sender] Amendment Status

NRC Region 3,

PharmaLogic has submitted an amendment request for our Traverse City Michigan pharmacy in

August of 2022 and again in April of 2023 to increase our possession limit for Ge-Ga generators. We have heard no response from either of these requests. Can the license review team at R3 please look into this issue and see what needs to be done to act on this request?

Thanks in advance.

James
