U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555

Subject: Docket Number Request for SHINE Technologies, LLC

SHINE has initiated efforts towards the licensing of an aqueous used nuclear fuel (UNF) recycling facility at a future location independent of its Janesville, WI operations. Part of this effort will include the development of a license application and related interactions with the Nuclear Regulatory Commission (NRC).

The purpose of this letter is to request the assignment of a docket number for the documents related to SHINE's license application review. This would include records that involve correspondence with SHINE on the license application and the pre-application review, internal interoffice memoranda related to the conduct of the review, and any outside organizations or individuals providing formal communications on any aspect of the review. As the prospective applicant, SHINE intends to begin regulatory engagement with the NRC in the 4th Quarter 2023.

Please address any questions regarding this request to Jim Costedio at (608)/210-1730.

Very truly yours,

DocuSigned by:
