**SUBJECT: TERMINATION OF RADIOACTIVE MATERIALS LICENSE FOR GENERAL
MOTORS LLC, NRC LICENSE NO. 21-00016-04**

Dear Mr. Blossfeld:

In NRC Form-314 dated June 28, 2023, General Motors notified the U.S. Nuclear Regulatory Commission (NRC) of a request to terminate NRC Materials License No. 21-00016-04. Your letter is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML23227A107.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

The NRC staff has reviewed your final status surveys. Based on its review, the NRC staff has concluded that all licensable radioactive material has been removed from the facilities located at 3300 General Motors Rd., Milford, Michigan, 48380 and 777 Joslyn Ave., Pontiac, Michigan, 48340. Further, the staff has determined that residual radioactive material attributable to licensed activities at the above locations does not exceed current NRC criteria.

Based on these conclusions, no further remediation or actions are required with respect to NRC-regulated material. Your facilities at 3300 General Motors Rd., Milford, Michigan, 48380 and 777 Joslyn Ave., Pontiac, Michigan, 48340 are suitable for unrestricted use, and NRC Materials License No. 21-00016-04 is hereby terminated. Please see the Enclosure for the amended license stating that the license is terminated.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.
