**Subject:** acceptance for review of UUSA license amendment request LAR-23-01  
**Date:** Tuesday, September 5, 2023 6:18:00 AM

---

Dear Chris Schwarz:

The U.S. Nuclear Regulatory Commission (NRC) staff has received your submittal dated August 3, 2023 (Agencywide Documents Access and Management System (ADAMS) Accession Number ML23220A389), pertaining to Louisiana Energy Services (LES), doing business as Urenco USA (UUSA), license amendment request LAR23-01 for elimination of IROFS50a, b, c, d, e, h, i, and j. The proposed change would eliminate IROFS for vehicle impacts and fires associated with construction activities. Approval of the amendment will result in revisions to the UUSA safety analysis report and UUSA integrated safety analysis summary.

We have completed our acceptance review of the submittal. We have identified no administrative omissions or deficiencies that would prevent us from proceeding with a detailed review. Your submittal has been assigned Enterprise Project Identification Number (EPID) L-2023-LLA-0107. Please reference this EPID number and Docket Number 07003103 in any future correspondence associated with this request.

Please note that the NRC staff's technical review of your submittal may identify issues that require additional information. Based on our preliminary evaluation and projection of current review schedules, we anticipate completing our formal review by December 22, 2023. This date could change depending on the findings of our technical review, urgent assignments, or other factors. We will promptly communicate any significant changes to this schedule. In addition, the NRC staff estimates that completing the review of your submittal will require approximately 300 staff hours which corresponds to about \$90,000.00 (current rate of \$300.00/hr).
