**Subject:** Application dated June 26, 2023  
**Date:** Tuesday, September 5, 2023 12:52:00 PM

---

Dear William Troxler, Jr. and Henry Barnes:

This is a supplemental communication to my attempts to contact your representatives over the phone:

This is in reference to your application dated June 26, 2023, requesting to amend NRC License No. 32-35585-01. To continue our review, we need the following additional information:

1. You are requesting to change the location of your licensed activities in Bethel, CT from Unit A-2 to A-7. If this is not simply a change in the numbering of the location, then this amendment can add Unit A-7 to the license but Unit A-2 would need to remain under your control until a request to remove it from the license is received with the appropriate documentation.
2. Regarding your request to change the Radiation Safety Officer named on the license, please provide documentation that the individual has received appropriate training for the position.
3. It is noted that the chart that included your emergency procedures was left out of this application. Including the chart is not required as it is included in other applications, but please confirm that your previously submitted emergency procedures still apply.
4. It is also noted that the final page of your application was previously submitted with the note: "The information below is just for the development of the license and has not been included in the package." Is the note still accurate?

Your reply must be an originally signed and dated letter. The letter may be scanned and submitted as a pdf document attached to an email; or it may be transmitted by facsimile to (610) 337-5349; or it may be sent by regular mail. If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.
