Subject: [External_Sender] LWT Iron Clad Submittal
Date: Wednesday, September 13, 2023 9:35:17 AM

Nishka,

Last week GNF and Constellation informed us of a change in the scheduled shipment for the LWT Iron Clad. The GNF field inspection team discovered an issue with 2 of the unfueled Ironclad rods. As a result they have decided to stop all work on the Ironclad bundles in order to prevent impacting their outage. Due to the decision to reschedule the Iron Clad rod shipment, the new need date for the issuance of the CoC would be prior to January 2025. Therefore, we do not need an expedited review of the LWT CoC revision request as we originally discussed. Please let management and your review team know.

I apologize for any inconveniences this may have caused and am open to have any follow-up discussions with Shana or Yoira if they desired.
