Dear Pat Jenny:

The U.S. Nuclear Regulatory Commission (NRC) staff has completed its acceptance review of your submission for approval for the Standard Practice and Procedures Plan Update and Transportation Plan submitted via letter dated August 25, 2023, (Agencywide Documents Access and Management System (ADAMS) Accession No. ML23243A847). The NRC staff did not identify any administrative omissions or deficiencies and determined that the application provides sufficient information to proceed with detailed technical review. The application has been assigned Enterprise Project Identification Number L-2023-SPR-0009. Please reference this number and Docket Number 7007033 in any future correspondence associated with this request.

Please note that the NRC staff's technical review of your application may identify the need for additional information. Based on the preliminary evaluation of your application and our review schedule projections, we anticipate completing our formal review by December 11, 2023. Our projected schedule includes the issuance, if needed, of a request for additional information (RAI) by the end of October 2023. Please note that these dates could change depending on the findings of our technical review, urgent assignments, or other factors, such as whether your responses to the RAIs resolve the issues. The NRC staff estimates that completing the review of your submittal will require approximately 160 staff hours which corresponds to about \$48,000.00 (at \$300.00/hour). We will promptly communicate significant schedule and/or cost changes, if any.

In accordance with Title 10 of the *Code of Federal Regulations* Part 2, "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room (PDR) or from the Publicly Available Records component of the NRC's ADAMS.
