NOTATION VOTE

RESPONSE SHEET

TO: Brooke P. Clark, Secretary
FROM: Commissioner Wright
SUBJECT: SECY-22-0098: Rulemaking Options for Revising Security Requirements for Facilities Storing Spent Nuclear Fuel and High-Level Radioactive Waste

Approved X Disapproved Abstain Not Participating

COMMENTS: Below X Attached None

Consistent with my vote on SECY-19-0100, I agree with the staff's assessment that the existing security requirements, along with the additional requirements in the post-9/11 security orders provide an appropriate regulatory framework for interim fuel storage facilities. Time has shown that these requirements are both robust and sufficiently clear for NRC staff, licensees, applicants, and other stakeholders to apply. Therefore, I approve staff's recommended Option 1 to discontinue the rulemaking for security requirements for facilities storing spent nuclear fuel and high-level waste. I also approve the staff's recommendation to delegate the authority for the issuance of the *Federal Register* notice to the Executive Director for Operations.
