Kerr-McGee Nuclear Corporation
ATTN: Mr. Morgan Moore, Vice President
Nuclear Manufacturing
P. O. Box 315
Crescent, Oklahoma 73028

Docket No. 70-925

Gentlemen:

In a letter dated March 5, 1975, we sent to you our report of the investigation of the pellet-scattering incident at the Cimarron Uranium Facility that you reported to us by telephone on December 17, 1974.

As indicated in the report, the total weight of the low-enriched pellet material was equivalent to about 25 pellets and contained approximately 278 grams uranium. We have no further interest in this material, and it is not necessary that the material be further retained for us as a discrete item.

Sincerely yours,

J. A. Hind, Chief
Materials and Plant
Protection Branch
