Re: Response letter - NRC

10/16/2023

Good morning.

In addition to our response for the Medical Licensing of our institution Manati Medical Center, a letter for clarification was received.

In the initial application (page 5) stated that the RSO will visit the facility once each week to review the Radiation Safety Program.

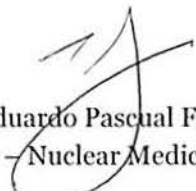

The reality is that I visit the Nuclear Medicine Department at least 3 times a week – the use of radioiodine is monitored at least once a week.

I will prefer to be stated that the program is reviewed once a month , in case of down times and vacations. With the help of David Rhoe – Medical Physicist the cases are reviewed at least once a month.

The second item for clarification stated “ 20 other facilities”... The Manati Medical Center Group includes 2 medical facilities and 1 independent Imaging Facility

- Mayaguez Medical Center , which I am Director and Authorized User – Carmelo Perez is our Medical Physicist and RSO. ( Limited Support to the NRC – licensed facility ).
- Bayamon Medical Center , which I am Director and Authorized User –David Rhoe is our Medical Physicist and RSO.
- CT Radiology Complex , which I help with Cardiac Stress testing , not and Authorized User –David Rhoe is our Medical Physicist and RSO ( Limited Support to the NRC – licensed facility ).
- The other 2 facilities are NOT in our Medical Group  
Arecibo Radiology - ( Small NRC – licensed facility ). Authorized User & RSO –Ms Palacios is our Medical Physicist.

Nuclear Partners – ( Very small NRC – licensed facility ). Authorized User & RSO –David Rhoe is our Medical Physicist.
