Date(s) and Time(s): November 13, 2023, 10:00 AM to 12:00 PM ET

Location: NRC Region II Office, Marquis One Tower, 8thFloor Conference Center Salon B

Category: This is an Observation Meeting. This is a meeting in which attendees will have an opportunity to observe the NRC performing its regulatory function or discussing regulatory issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed following the business portion of the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: The purpose of this regulatory conference is to discuss, before the agency makes a final determination, the safety significance of a preliminary finding of substantial safety significance (Yellow) and associated apparent violation of NRC requirements regarding a condition adverse to quality that was not corrected and eventually resulted in the inoperability of an emergency diesel generator at the V.C. Summer Nuclear Station. The preliminary finding and apparent violation are discussed in NRC Inspection Report 05000395/2023090, dated October 4, 2023 (NRC's Agencywide Documents Access and Management System [ADAMS] Accession No. ML23268A467).
