Subject: Request for clarification for NRC Materials License No. 34-32780-04MD
Date: Monday, September 25, 2023 4:08:00 PM

Dear Evan T. Western:

We reviewed your letter dated August 23, 2023, for NRC Materials License No. 34-32780-01MD. Based on the review, we would like to clarify the following.

You request to change the frequency of reviews of the radiation safety program by the Radiation Safety Committee from trimester (every three months) to at least twice per year (this could mean the gap between two reviews can be anytime less than 12 months). The definition for a period of twice per year is different than the definition of every six months. Therefore, you would like to confirm if your intention was to change from one every three months (trimester) to one every six months (semiannual).

If your intention was the above, please update and resubmit only Item 1 in your letter to reflect such.

To continue the review of your application, we request that you submit your response under a dated and signed cover letter by October 23, 2023. In the cover letter, please reference the license number and Mail Control No. 636862. If you have questions, require additional time to respond, or require clarification on any of the information stated above, please contact me at 630-829-9623 or reply to this email.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390 of the NRC's "Rules of Practice," a copy of this correspondence will be made available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Best regards,

Frank Tran
