Subject: U.S. NRC Materials License No. 13-15151-01 - Request for Additional Information

Mr. Hatten:

I have reviewed your request dated October 2, 2023, to amend U.S. Nuclear Regulatory Commission (NRC) Materials License No. 13-15151-01 (Northwest Health-LaPorte) to add authorization for additional Authorized Users.

Your request is limited to 10 CFR 35.200 (limited to cardiac studies only). Though, we would be able to authorize the physicians for full authorization for 10 CFR 35.200 with no limitations. Please advise if you'd like the physicians to have full authorizations for 10 CFR 35.200 or if you would like to have the physicians restricted to 10 CFR 35.200 (limited to cardiac studies only).

In the future, please do include documentation that the requested physicians are appropriately licensed by the state medical board. Though, I have verified the credentials for the requested physicians in this case.
