

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION IV
1600 EAST LAMAR BOULEVARD
ARLINGTON, TEXAS 76011-4511

April 5, 2022

Kay Kassel, MS, CNMT
Radiation Safety Officer
Diagnostic Health Center of Anchorage, LLC
A wholly owned subsidiary of Alliance HealthCare Services
4100 Lake Otis Parkway #102
Anchorage, AK 99508

SUBJECT: AMENDMENT 24 TO RADIOACTIVE MATERIALS LICENSE FOR DIAGNOSTIC
HEALTH CENTER OF ANCHORAGE, LLC., LICENSE NO. 50-23214-01

Dear Kay Kassel:

This letter refers to the Nuclear Regulatory Commission's (NRC) review of the indirect change of control and/or transfer of ownership that was submitted to the NRC Region IV office by Alliance HealthCare Services Inc. ("Alliance"), the owner of Licensee, Diagnostic Health Center of Anchorage, LLC., in an amendment request dated July 6, 2021, which included the required documentation. The change of control and/or transfer of ownership supporting documentation stated that under the terms of the Agreement, Thaihot Investment Co., LTD. ("Thaihot"), will sell its shares in Thaihot Investment Company US Limited ("Thaihot Holdings") to Akumin Corp. Thaihot Holdings is the sole owner of Alliance HealthCare Services Inc. ("Alliance"), which is the owner of the Licensee, Diagnostic Health Center of Anchorage, LLC. The transfer of control is described in Agency Documents Access and Management System (ADAMS) Accession No. ML21196A052. In addition, the change of control and/or transfer of ownership documentation states that Diagnostic Health Center of Anchorage, LLC, a wholly owned subsidiary of Alliance HealthCare Services, agreed to abide by all statements, representations, procedures, conditions, and commitments made by Alliance. This indirect acquisition occurred on or about August 1, 2021. The NRC staff reviewed this request and approved in License No. 50-23214-01, Amendment 24, issued April 5, 2022.

Based on the license amendment request dated July 6, 2021, and the required documentation received by the NRC for the indirect change of control and/or transfer of ownership, the NRC determined that the submitted information sufficiently describes the transaction; documents the understanding of the license and commitments; demonstrates that personnel have the experience and training to properly implement and maintain the license and that they will maintain the existing records; and, assures that in the future, the licensee will abide by all existing commitments to the license, consistent with the guidance in NUREG 1556, Volume 15, Revision 1.

An environmental assessment for this licensing action is not required since this action is categorically excluded under 10 CFR 51.22(c). You should review this license carefully and be sure that you understand all conditions. You can contact Latischa Hanson at (817) 200-1286 if you have any questions about this license.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement is not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

The NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address at <https://www.nrc.gov/about-nrc/regulatory/enforcement/enforce-pol.html>. An electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. Additional information regarding use of radioactive materials may be obtained on the NRC Web site at <https://www.nrc.gov/materials/miau/mat-toolkits.html>. This site also provides the link to the toolbox for updated information on the revised regulations for naturally- occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Signed by O'Keefe, Cornelius
on 04/05/22

Neil O'Keefe, Chief
Materials Licensing Branch
Division of Radiological Safety & Security
