Subject: [External_Sender] Re: NRC Inspection Report
Date: Thursday, July 28, 2022 12:09:23 PM

Annual testing for safety using nuclear gauges has been sent out and I am receiving atheist on the technicians little by little. Chains are now being used in replacement of the bicycle locks that were too long to secure the nuclear gauge boxes closed. A new maintenance form is been drawn up now four checking the condition and inventory of each nuclear gauge. If you need pictures of any of these items please let me know. Thank you for your time and patience.

Good afternoon Chuck,

Just checking in to confirm that you received the inspection report we sent last month (attached).

We requested a written response to confirm the corrective actions you've taken to restore compliance and prevent recurrence for each of the violations. That response was due last week but if you can get one in by end of next week that should be fine. Just email it to me once you finish it, thanks.
