Subject: Amendment to the NRC broad scope license (License # 21-00741-08, Docket # 030-01995) detailing the addition of sealed sources to calibrate instruments in item 6 A.)

Dear Sir/Madam,

Please find the attached amendment request to add the sealed sources under Item 6.A. for instrument calibration purposes. These sealed sources will be used for instrument calibration purposes only.

All gamma emitting sealed sources with a maximum activity of 100 microcuries or more will be leak-tested every six months to ensure the source does not exceed the limit of 0.005 microcuries of removable contamination. These sealed sources will be securely locked when not in use.

The researcher intended to purchase the Cs-137 sealed source in January. Therefore, I request, if possible, to expedite the amendment process.

Please contact me if any questions at 313-577-0019 or at msriniva@wayne.edu.

Thank you.

Sincerely,

Maha Srinivasan, MS
