Lisle, IL 60532-4352

Re: Amendment to License # 24-35155-01

Integrated Science Support, Inc. is requesting an amendment to Radioactive Materials License 24-35155-01.

It has come to our attention that the NRC believes that we are not authorized to perform services at our client's facilities (i.e., sealed source leak testing). Therefore, we would like to amend our license to include the following under Section 10.

"Radioactive material may be used at temporary job sites of the licensee anywhere the department maintains jurisdiction for regulating the use of radioactive material."

If you have any questions regarding this application, please contact Greg Sackett at (816) 390-9011.

Thank you for your consideration.

Greg Sackett, M.S., CHP  
Co-Owner and RSO

---

Hi Tammy,

Please process this as an amendment request.

Thank you,

Frank

**Subject:** [External\_Sender] Amendment Request for NRC License No. 24-35155-01 (Integrated Science Support, Inc.)

Mr. Tran,

Attached is an amendment request for our license.

During a recent reciprocity request with Kansas we were informed that the NRC believes that our current license does not allow us to perform services at our clients facilities. Obviously we have been doing this for many years and NRC inspectors have been well aware of this, so perhaps it was an oversight on everyone's part. In any case, we would like to amend our license to perform services at temporary job sites (i.e., our clients licensed facilities).

Thank you for your assistance in this matter.

Merry Christmas!
