

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

December 27, 2023

Andrea Ferkile, Director
for the Office of Nonproliferation
Office of Nonproliferation and Arms Control
National Nuclear Security Administration
U.S. Department of Energy
1000 Independence Avenue, S.W.
Washington, D.C. 20585

Dear Director Ferkile:

Enclosed is an application (XSOU8798/11), dated October 31, 2023, received by the U.S. Nuclear Regulatory Commission, from RSB Logistics, requesting to amend export license XSOU8798/10. The license currently authorizes the export a cumulative total of 12,000,000 kilograms of natural uranium in the form of uranium ore concentrate (U-3O8) to Canada for conversion. The uranium authorized for export is to be converted and returned to the United States. Canada must obtain U.S. prior approval before the material is re-transferred.

The purpose of the amendment is to add eCore Energy as a U.S. Party(ies) to the Export.

The NRC will perform an internal review. The NRC intends to issue the requested license after the 30-day time period allotted for public review has expired, and it is determined that the applicable export license criteria are met. Please feel free to reach out with any questions to the Licensing Officer, Stephen Baker at Stephen.baker@nrc.gov and cc the Licensing Assistant, Charlese Smith at charlese.smith@nrc.gov.

Sincerely,

12/27/2023

X Peter J. Habighorst
